## RSS FEEDS AVAILABLE ON KDE WEB SITE

(FRANKFORT, Ky.) – The Kentucky Department of Education now offers RSS feeds on selected sections of its Web site.

RSS (Rich Site Summary or Really Simple Syndication) is a format for providing information about Web content that changes regularly. RSS feeds provide a means for users to be notified when a Web page changes or new items are added. This allows individuals to stay informed and save time as they keep up with the latest additions.

Look for the small orange RSS icon on the site, or the orange auto-discovery icon in your browser bar, to subscribe to the various content feeds.

Pages that have been RSS-enabled include the Current Press Releases/Advisories site and the Commissioner's Messages to Superintendents.
